

TECHKON Academy

Seminars 2024

It is of particular importance for us that you are familiar with the handling of our measuring instruments. Therefore, we offer informative training courses on quality assurance and measurement technology at regular intervals.

Dates 2024

Thursdays from 10:00 to 14:00.

- January 25, 2024
- February 29, 2024
- March 28, 2024
- April 25, 2024
- July 25, 2024
- September 26, 2024
- October 31, 2024
- November 28, 2024

Contents

The 4-hour seminar is divided into two learning modules:

I. Quality assurance in the printing industry

- Prerequisites for high print quality
- Concept of standardization
- Basics of measurement technology
- Densitometry and colorimetry
- Which measurement device suits which application?
- TECHKON's quality policy

II. Use of measurement technology

- Measurements on plates
- Measurements on prints
- Printing according to ISO standard
- Evaluation of a Fogra media wedge

Procedure

The seminars take place as online trainings or onsite at TECHKON.

The number of participants is limited to a maximum of 8 persons. This ensures that the specific applications of each participant can be addressed individually and that the handling of the measurement instruments is practiced intensively.

We provide loaner devices for practical exercises if required. Please contact us.

The training is carried out by experienced instructors with comprehensive practical knowledge.

Each participant receives a certificate of participation as well as the TECHKON training documents.

Registration

Please contact us by phone or by e-mail at info@techkon.com. We can then coordinate the desired date together with you.

Costs

The training costs € 250,- per participant.
